

#### NOTES:

1. PIN 4 (+5 VDC) can be used to power Audiuno Uno, shield and PS2 keyboard.

PIN 4 (+5 VDC) CANNOT be used to power Arduino DUE!!

In both cases, it is recommended to use +10 VDC from Commodore 64 C19(+) and connect through the power port (barrel connector) on the Audiuno.

Ardiuno UNO/DUE project  
UNO/DUE – PS2 keyboard to C64  
DUE – USB keyboard to C64
